- Team Number:
  - Chelsea Group 102-4
- Team Name:
  - NoSass
- Application Name:
  - Wingz
- Vision Statement
  - To make more bird friends! To connect bird lovers with birds and also to help those who dislike birds avoid them.
- Version Control
  - http://github.com/Palmergill/WingZ.Minutes.git (minutes repo)
  - https://github.com/JDIsenhart/WingZ.Code.git (code repo)
  - https://github.com/poketrumpeter/WingZ.Milestones (Milestone repo)
- Development Method
  - Our group shall follow the Agile development methodology. While we may employ a waterfall method in our initial framework development, during the flush-out of features will be using Agile.
- Communication Plan
  - We plan to communicate through a group text message. Should that fail, Smoke Signals shall be our next bet.
- Proposed Architecture Plan
  - Our app shall be in the form of an android app, utilizing Java, JavaScript, and supporting languages for the front end, connected to a primary database hosted on an AWS instance. We shall develop a web-oriented intermediary that provides inter-communication between the data-hosting backend and the front end. We shall also have a web-facing portal, allowing for multiple devices types and operating systems.
- Meeting Plan
  - Friday's around 11AM. We will either meet at Ana's or Norlin
